AI Specialist

Description

Our client is seeking an experienced and innovative AI Specialist to join their team. The AI Specialist will be responsible for developing, implementing, and maintaining artificial intelligence solutions to enhance their products and services. The ideal candidate will have a strong background in machine learning, natural language processing, and data analytics.

Responsabilités

- Designing and developing machine learning models and algorithms to solve complex business problems.
- Collaborating with cross-functional teams to identify opportunities for integrating AI technologies into existing systems and processes.
- Conducting research and experimentation to explore new AI techniques and methodologies.
- Implementing and deploying AI solutions in production environments, ensuring scalability, reliability, and performance.
- Evaluating the performance of AI models and algorithms and iterating on improvements as necessary.
- Staying updated on the latest developments and trends in AI and machine learning technologies.

Qualifications

- Bachelor's degree in Computer Science, Engineering, Mathematics, or related field; Master's preferred.
- Proven experience in developing and implementing machine learning solutions, with a strong portfolio of projects.
- Proficiency in programming languages such as Python, R, or Java, and familiarity with machine learning libraries such as TensorFlow, PyTorch, or scikit-learn.
- Solid understanding of machine learning algorithms, statistical methods, and data structures.
- Experience with natural language processing (NLP), computer vision, or other AI domains is a plus.
- Strong problem-solving skills and ability to think creatively
